

TECHNICAL DATA SHEET

Apo Patchone Coeur

Product Name: Apo Patchone Coeur

Functional category: Aroma chemical; perfume ingredient

Chemical classification: Mixture

Manufacturer: International Flavors & Fragrances (IFF)

Chemical name: cis,trans-4-(Isopropyl)cyclohexanemethanol

CAS number: 4621-04-9

EC number: 225-035-0

Description: Cyclohexanol (Apo Patchone Coeur) belongs to the herbal fragrance family. IFF experts describe it as a diffusive floral scent combining notes of lilac, rose, and geranium. The fragrance exhibits excellent stability and does not cause discoloration in the final product. It is a colorless to pale yellow clear liquid, soluble in alcohol and insoluble in water.

Application: Used in the production of fragrance compounds at a concentration of 1% to 10%. It is stable in alcoholic lotions, antiperspirants, bleaching agents, deodorant sticks, detergents, fabric softeners, hard surface cleaners, shampoos, and soaps. For external use only.

Storage: The product is stable when stored in a cool and dry place.
