

TECHNICAL DATA SHEET

Apricot Ornat Fragrance Oil

Product Name: Apricot Ornat Fragrance Oil

Olfactory Classification: Apricot Ornat Fragrance Oil belongs to the Fruity–Gourmand fragrance family, characterized by a distinctly warm, sweet, and creamy profile. The composition combines rich apricot notes with gourmand accords of caramel and vanilla, creating a warm and natural olfactory character.

Fragrance Oil Description: The composition is rich, pleasant, and well-rounded, with medium intensity and stable diffusion. The fragrance profile is fruity, warm, and soft, with a pronounced gourmand effect. The opening is formed through a combination of almond and peach. Almond provides a delicate nutty and sweet nuance, while peach contributes juicy fruity richness, creating a warm and pleasant first impression.

In the heart of the composition, apricot and apricot jam accords take center stage. Fresh apricot provides soft fruity freshness and natural sweetness, while the apricot jam accord contributes a rich and caramelized gourmand dimension. This combination forms a full and expressive heart with a pronounced fruity-sweet character.

The base structure is built around caramel and vanilla. Caramel provides deep and warm sweetness, while vanilla contributes creamy richness and softness. The dry-down is enveloping, stable, and long-lasting, with a pronounced sensation of warmth and sensory comfort.

The dominant accords of this composition include fruity sweet, gourmand caramel, vanilla creamy, and nutty soft facets, which together create a rich and commercially attractive fragrance profile. Fruity and gourmand aspects remain dominant, while the base contributes stability and extended longevity.

Application: Apricot Ornat Fragrance Oil is intended for use in scented candles and wax applications formulated with a focus on naturally derived products. The composition was developed as part of a fragrance collection suitable for formulations compliant with COSMOS Natural and COSMOS Organic standards.

TECHNICAL DATA SHEET

The recommended usage level in formulations ranges between 5% and 7%, ensuring an optimal balance between fragrance intensity and preservation of the natural olfactory profile. Due to variations in waxes and base materials, individual testing is recommended in order to optimize dosage levels. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and uniform diffusion, with a pronounced natural and long-lasting fruity-gourmand character.
