

TECHNICAL DATA SHEET

Beauty of the Islands Fragrance Oil

Product Name: Beauty of the Islands Fragrance Oil

Olfactory Classification: Beauty of the Islands Fragrance Oil belongs to the Tropical-Floral fragrance family, characterized by a distinctly exotic, creamy, and sun-kissed profile. The composition combines coconut and white floral notes with a warm musky-vanilla base, creating a rich and sensual olfactory character.

Fragrance Oil Description: The composition is rich, exotic, and enveloping, with medium to strong intensity and stable diffusion. The fragrance profile is warm, floral, and creamy, with a pronounced tropical character. The opening is formed through a combination of coconut, frangipani, and tuberose. Coconut provides creamy tropical sweetness, frangipani contributes intense floral richness and exotic warmth, while tuberose introduces a deep and sensual floral dimension. This combination creates a luxurious and distinctive first impression.

In the heart of the composition, a rich tropical-floral accord develops, dominated by tiare flower, jasmine, and ylang-ylang. Tiare flower provides pronounced tropical sensuality and freshness, jasmine contributes elegant floral richness, while ylang-ylang introduces warm and subtly fruity exotic nuances. This combination forms an intense and harmonious heart with a distinct island-inspired character.

The base structure is built around vanilla, musk, and peach. Vanilla provides warmth and gourmand richness, musk contributes softness and longevity, while peach introduces delicate fruity sweetness and smoothness. The dry-down is soft, creamy, and long-lasting, with a pronounced sensation of warmth and sensory comfort.

The dominant accords of this composition include tropical floral, coconut creamy, vanilla soft, and musky warm facets, which together create a rich and highly commercially attractive fragrance profile. Tropical and floral aspects remain dominant throughout the fragrance evolution, while the base contributes stability and extended longevity.

TECHNICAL DATA SHEET

Application: Beauty of the Islands Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax applications, and other perfumery products. Individual testing is recommended in order to determine the optimal concentration depending on the type of base and the desired fragrance intensity.

For wax-based formulations, it is recommended to incorporate the fragrance during the appropriate liquid phase in order to achieve even dispersion. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and uniform diffusion, with a pronounced and long-lasting tropical-floral character.
