

TECHNICAL DATA SHEET

Cashmere & Silk Fragrance Oil

Product Name: Cashmere & Silk Fragrance Oil

Olfactory Classification: Cashmere & Silk Fragrance Oil belongs to the Oriental–Woody–Powdery fragrance family, characterized by a warm, elegant, and sophisticated profile. The composition combines spicy, resinous, and powdery floral notes with a rich woody-balsamic base that enhances depth and longevity.

Fragrance Oil Description: The composition is sophisticated, rich, and elegantly enveloping, with medium to strong intensity and stable diffusion. The fragrance profile is warm, powdery, and slightly resinous, with a pronounced sense of luxurious softness.

The opening is formed through a combination of saffron, elemi, cedar leaf, and violet leaf. Saffron provides warm spicy exoticism, elemi adds citrus-resinous depth, cedar leaf introduces a fresh woody structure, while violet leaf contributes a green and slightly floral nuance that softens the initial impression.

In the heart of the composition, a rich powdery–resinous accord develops, dominated by davana, styrax, iris, and rose. Davana adds fruity-herbal complexity, styrax contributes warm balsamic depth, iris introduces an elegant powdery softness, while rose provides delicate floral richness and sophistication. This combination forms a luxurious and harmonious heart with a strong tactile softness.

The base structure is built around vanilla, white cedar, myrrh, and sandalwood. Vanilla delivers warm and enveloping sweetness, white cedar provides clean woody stability, myrrh introduces resinous and slightly smoky depth, while sandalwood adds a creamy and long-lasting finish.

The dry-down is elegant, warm, and persistent, with a pronounced sense of luxurious sensory comfort. The dominant accords of this composition include powdery woody, oriental balsamic, floral soft, and vanilla warm facets, which together create a highly sophisticated and commercially attractive fragrance profile. Powdery and woody-oriental aspects remain dominant throughout the fragrance evolution, while the base contributes stability and extended longevity.

TECHNICAL DATA SHEET

Application: Cashmere & Silk Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax applications, and other perfumery products. Individual testing is recommended in order to determine the optimal concentration depending on the type of base and the desired fragrance intensity.

For wax-based formulations, it is recommended to incorporate the fragrance during the appropriate liquid phase in order to achieve even dispersion. For maximum permitted concentrations, consultation of the IFRA certificate is required.

The fragrance demonstrates good stability and uniform diffusion, with a pronounced and long-lasting oriental-woody-powdery character.
