

TECHNICAL DATA SHEET

Cherry Blossom Fragrance Oil

Product name: Fragrance oil "Cherry Blossom".

Olfactory classification:

Cherry Blossom Fragrance Oil belongs to the floral-fruity fragrance family, with a pronounced delicate, airy, and elegant character. The composition combines citrus notes with a rich floral heart and a warm musky-woody base, creating a sophisticated and pleasantly enveloping fragrance profile.

Fragrance description:

The composition is light, elegant, and harmoniously balanced, with medium intensity and stable diffusion. The scent profile is floral, subtly fruity, and softly creamy-warm, with a pronounced spring-like freshness.

The opening is built around a combination of bergamot and mandarin. Bergamot provides a refreshing citrus note with a mild bitter elegance, while mandarin contributes juicy fruity sweetness and a bright citrus character. This combination creates a fresh and luminous first impression.

In the heart, a rich floral accord develops, dominated by jasmine, rose, and apple blossom. Jasmine adds an intense and elegant floral fullness, rose contributes a classic and romantic floral depth, while apple blossom introduces a light, delicate, and spring-like sweetness. This combination forms a sophisticated and harmonious heart with a pronounced airy floral effect.

The base structure is built on sandalwood, vanilla, and musk. Sandalwood provides a creamy woody fullness and stability, vanilla contributes a warm and soft sweetness, while musk ensures gentle sensuality and extends the longevity of the composition. The dry-down is soft, elegant, and long-lasting, with a pronounced sense of cleanliness and pleasant warmth.

The dominant accords of this composition include floral soft, fruity fresh, musky clean, and woody creamy facets, which together form a modern and highly commercially appealing fragrance character. The floral and fruity aspects remain dominant throughout the evolution of the scent, while the base ensures stability and extended longevity.

TECHNICAL DATA SHEET

Application:

Cherry Blossom Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax melts, and other perfumery products. Individual testing is recommended to determine the optimal concentration depending on the type of base and the desired fragrance intensity. In wax-based formulations, it is recommended to add the fragrance during the appropriate phase of the liquid wax to ensure even dispersion. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates good stability and even diffusion, with a pronounced and long-lasting floral-fruity character.
