

TECHNICAL DATA SHEET

Cherry Fragrance Oil

Product name: Fragrance oil "Cherry".

Olfactory classification:

Cherry Fragrance Oil belongs to the fruity-gourmand fragrance family, with a pronounced sweet, juicy, and warm character. The composition combines intense cherry fruit notes with almond, balsamic, and vanilla accords, creating a rich and sensorially enveloping fragrance profile.

Fragrance description:

The composition is rich, juicy, and distinctly gourmand, with medium to strong intensity and stable diffusion. The scent profile is fruity, sweet, and subtly balsamic, with a pronounced impression of ripe cherry and warm dessert-like nuances.

The opening is built around a combination of cherry, orange, and rose. Cherry provides a dominant fruity fullness and intense sweetness, orange contributes a bright citrus freshness with a slight tangy lift, while rose introduces a soft floral elegance that smooths and balances the initial impression of the composition.

In the heart, a fruity-gourmand accord develops, dominated by almond, orange, and hawthorn. Almond adds a warm, slightly nutty sweetness reminiscent of fruit desserts with almond nuances, orange enhances the composition with additional citrus brightness, while hawthorn contributes a soft floral-vanillic depth. This combination forms a rich and harmonious heart with a pronounced dessert-like character.

The base structure is built on tonka bean, raspberry, and benzoin. Tonka bean provides warm vanillic fullness and reinforces the gourmand character, raspberry adds an additional fruity freshness with a slight tart nuance, while benzoin introduces balsamic and gently spicy depth. The dry-down is rich, sweet, and long-lasting, with a pronounced sense of warmth and sensorial fullness.

The dominant accords of this composition include fruity sweet, gourmand almond, balsamic warm, and soft vanilla facets, which together form an intense and highly commercially appealing fragrance character. The fruity and gourmand aspects remain dominant throughout the evolution of the scent, while the base ensures stability and extended longevity.

TECHNICAL DATA SHEET

Application:

Cherry Fragrance Oil is intended for use in fragrance formulations, including scented candles, wax melts, and other perfumery products. Individual testing is recommended to determine the optimal concentration depending on the type of base and the desired fragrance intensity. In wax-based formulations, it is recommended to add the fragrance during the appropriate phase of the liquid wax to ensure even dispersion. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates good stability and even diffusion, with a pronounced and long-lasting fruity-gourmand character.
