

TECHNICAL DATA SHEET

Coconut and Lime Fragrance Oil

Product name: Fragrance oil "Coconut Lime".

Olfactory classification:

Coconut Lime Fragrance Oil belongs to the citrus–tropical gourmand fragrance family, with a pronounced citrus, coconut, and creamy vanilla character. The composition combines refreshing citrus notes with rich tropical accords and a warm gourmand dry-down.

Fragrance description:

The composition is vibrant, tropical, and refreshing, with a strong interplay of citrus brightness and creamy coconut fullness. The fragrance has medium to strong intensity and very good diffusion, featuring a modern tropical–gourmand character.

The opening is built around a combination of lime, yuzu, and verbena. Lime provides intense citrus freshness with a sharp tangy energy, yuzu contributes an exotic citrus aroma with aromatic depth, while verbena adds soft herbal freshness and airiness. This combination creates a bright and energetic first impression reminiscent of tropical citrus cocktails.

In the heart, a blend of coconut pulp, peach, and lemon blossom develops. Coconut pulp delivers rich creamy tropical fullness and a pronounced gourmand effect, while peach adds juicy softness and gentle sweetness. Lemon blossom introduces light floral elegance and additional citrus freshness, forming a harmonious and highly pleasant heart.

The base structure is built on coconut milk, vanilla, and tonka bean. Coconut milk enhances the creamy tropical character and adds smooth sensory fullness, vanilla contributes warm gourmand sweetness and softness, while tonka bean provides subtle spicy depth with faint almond-like nuances. The dry-down is warm, creamy, and long-lasting, with a pronounced tropical gourmand trail.

The dominant accords of this composition include citrus tropical, creamy coconut, exotic fruity, vanilla gourmand, and soft floral facets. The fragrance is especially suited for formulations requiring a refreshing, exotic, and highly commercially appealing tropical character.

TECHNICAL DATA SHEET

Application:

Coconut Lime Fragrance Oil is intended for use in scented candles, wax melts, diffusers, and other fragrance formulations. Recommended usage levels are typically 7–10% for candles and 10–15% for wax melts, depending on the desired intensity and type of base. In wax-based formulations, it is recommended to add the fragrance to the liquid wax according to the wax manufacturer's instructions to ensure optimal dispersion and stability. For maximum allowable usage levels, consultation of the IFRA certificate is required. The fragrance demonstrates very good stability and diffusion, with a pronounced and long-lasting citrus–coconut character.
