

TECHNICAL DATA SHEET

Fig & Sandalwood Fragrance Oil

Product name: Fig & Sandalwood Fragrance Oil

Olfactory classification: Fig & Sandalwood Fragrance Oil belongs to the woody-oriental fragrance family, characterized by a pronounced resinous, spicy and warm profile. The composition is built around a combination of dark balsamic and woody notes, complemented by a subtle fruity aspect that contributes complexity and depth.

Fragrance oil description: The composition is deep, complex and richly structured, with a medium to strong intensity and stable diffusion. The fragrance character is warm, resinous and slightly smoky, with a pronounced effect of elegance and sensory richness. The opening of the fragrance is formed through a combination of incense, leather accord and labdanum (cistus). Incense provides a smoky and meditative nuance, the leather accord introduces a refined and textured depth, while labdanum contributes resinous warmth and slightly sweet richness, creating an intense and distinctive first impression. In the heart of the fragrance, sandalwood dominates in combination with myrrh, cardamom, cypress and clove. Sandalwood provides a warm and creamy woody foundation, myrrh adds balsamic depth, while cardamom and clove contribute spicy warmth. Cypress introduces a fresh woody nuance that balances the density of the composition. This combination forms a rich and layered heart accord. The base structure is built around amber, musk and cedarwood. Amber provides warmth and roundness, musk ensures softness and longevity, while cedarwood introduces a stable woody foundation that reinforces the structure of the composition. The drydown is warm, long-lasting and distinctly present, with a pronounced sensation of depth and elegance. The dominant accords of this composition include woody resinous, smoky incense, spicy warm and musky amber facets, which together create a complex and commercially appealing fragrance profile. Woody and resinous aspects are dominant, while spicy and musky notes contribute depth and lasting performance.

Application: Fig & Sandalwood Fragrance Oil is intended for use in fragranced formulations, including candles, wax melts and other perfumed products, where dosage should be adjusted according to the desired fragrance intensity. Testing is recommended in order to determine the optimal concentration depending on the type of base and technological system used. Maximum permitted concentrations should be verified according to the IFRA certificate. The fragrance demonstrates good
