

TECHNICAL DATA SHEET

Fresh Basil Fragrance Oil

Product name: Fresh Basil Fragrance Oil

Olfactory classification: Fresh Basil Fragrance Oil belongs to the aromatic herbal, green spicy, and fresh woody fragrance family, characterized by a pronounced green, aromatic, and herbal-spicy profile. The composition combines notes of basil, verbena, anise, and galbanum, creating a refreshing and natural fragrance inspired by aromatic Mediterranean herbs and morning freshness.

Fragrance oil description: The composition is fresh, aromatic, and distinctly herbal, with a natural green character and elegant spicy depth. The fragrance has a medium intensity, very good diffusion, and a long-lasting aromatic trail.

The opening of the composition is built around a fresh accord and anise. The fresh accord creates the effect of crisp morning air and dewy vegetation, while anise introduces a subtly sweet and spicy aromatic nuance that gives the composition its recognizable character.

In the heart of the fragrance, a blend of basil and verbena develops. Basil dominates the composition with its green, slightly peppery, and aromatic tones, creating an authentic herbal profile. Verbena contributes citrus-green freshness and a delicate lemon-like nuance, enhancing the sensation of natural cleanliness and vitality.

The base structure is composed of galbanum and clove. Galbanum provides intense green and earthy depth with a pronounced botanical character, while clove introduces a warm spicy note that stabilizes the composition and prolongs its aromatic trail.

The dominant accords of this composition include fresh basil, green herbs, aromatic spice, citrus herbal, and woody green profiles. The fragrance leaves a clean, refreshing, and naturally aromatic trail, with a pronounced effect of freshly crushed basil leaves and Mediterranean herbs.

Natural content: Fresh Basil Fragrance Oil contains approximately 9.81% natural ingredients and around 50.53% naturally derived ingredients. The composition has been developed with a focus on balancing high olfactory quality and an increased proportion of naturally derived raw materials.

TECHNICAL DATA SHEET

Application: Fresh Basil Fragrance Oil is intended for use in scented candles, wax melts, diffusers, and other fragranced formulations. Recommended concentrations for scented candles generally range from 7–10%, while for wax melts concentrations of 10–15% are recommended, depending on the desired intensity and type of base.

For wax-based formulations, it is recommended to add the fragrance into the liquid wax base according to the wax manufacturer's guidelines in order to achieve optimal dispersion and fragrance stability.

For maximum permitted concentrations, please refer to the IFRA certificate. The fragrance demonstrates very good stability and a pronounced aromatic-green character.

Regulatory compliance: This fragrance oil is manufactured in accordance with European regulations (CLP EC No. 1907/2006 and 1223/2009/CEE) and French IFRA standards.
