

TECHNICAL DATA SHEET

Guaiac Wood Fragrance Oil

Product Name: Fragrance Oil "Bois de Gaïac".

Olfactory Classification:

Bois de Gaïac Fragrance Oil belongs to the woody amber, leathery oriental, and creamy sandalwood fragrance family, characterized by a rich woody, leathery, and warm balsamic profile. The composition combines notes of leather accord, sandalwood, patchouli, vanilla, and amber, creating a luxurious and sophisticated scent inspired by opulent woody perfume compositions.

Description of the Fragrance Oil:

The composition is rich, elegant, and deeply woody, with warm balsamic nuances and a pronounced luxurious character. The fragrance has a medium to strong intensity, excellent longevity, and a refined long-lasting trail.

The opening of the composition is built around the blend of leather accord and heliotrope. The leather accord provides a sensation of luxury, warmth, and elegant depth, reminiscent of fine leather and sophisticated interiors. Heliotrope softens the composition with powdery and slightly almond-like nuances that add a smoother and more refined texture to the introduction.

At the heart of the fragrance, sandalwood dominates the composition. Sandalwood delivers a rich creamy-woody fullness and warmth, giving the fragrance a calming, elegant, and highly luxurious character. This note forms the central structure of the fragrance and contributes remarkable depth and stability.

The base structure is composed of patchouli, vanilla, and amber. Patchouli adds earthy and slightly spicy depth, vanilla contributes warm gourmand softness and a creamy finish, while amber introduces resinous warmth and sophisticated balsamic richness that enhances the longevity of the fragrance.

The dominant accords of this composition include woody amber, creamy sandalwood, soft leather, warm vanilla, and patchouli resinous facets. The fragrance leaves an elegant, warm, and luxuriously woody trail with a pronounced balsamic-oriental character.

TECHNICAL DATA SHEET

Applications:

Bois de Gaiac Fragrance Oil is intended for the production of scented candles, wax melts, diffusers, and other fragrance formulations. The recommended concentration for scented candles is generally between 7–10%, while for wax melts the recommended usage level is 10–15%, depending on the desired intensity and the type of wax base used.

For wax-based formulations, it is recommended to incorporate the fragrance into the liquid wax base according to the wax manufacturer's guidelines in order to achieve optimal dispersion and stability. For maximum allowable concentrations, consult the IFRA certificate. The fragrance demonstrates very good stability and a pronounced woody-oriental character.

This fragrance oil is manufactured in accordance with European regulations (CLP EC No. 1907/2006 and 1223/2009/EC) and complies with French IFRA standards.
