

TECHNICAL DATA SHEET

Lemon Mint Fragrance Oil

Product Name: Lemon Mint Fragrance Oil.

Olfactory Classification: Lemon Mint Fragrance Oil belongs to the fresh citrus, mint aromatic, and ozonic fruity fragrance family, characterized by a pronounced citrusy, minty, and refreshingly fruity profile. The composition combines notes of grapefruit, rhubarb, lychee, mint, blackcurrant, and ozonic accords, creating a modern and energetic fragrance with an intense sensation of freshness.

Description of the Fragrance Oil: The composition is fresh, vibrant, and exceptionally refreshing, featuring a harmonious blend of citrus, fruity, and minty nuances. The fragrance exhibits medium intensity, excellent diffusion, and a clean, long-lasting trail.

The opening of the composition is built around grapefruit, rhubarb, and lychee. Grapefruit provides vibrant citrus energy and a subtle bitterness, while rhubarb contributes a green, tangy freshness. Lychee introduces an exotic fruity sweetness that softens the citrus character and lends the composition a more contemporary fruity dimension.

In the heart of the fragrance, notes of peppermint, spearmint, and blackcurrant emerge. Peppermint delivers an intense mentholated freshness and a sensation of cool air, while spearmint contributes a softer and sweeter herbal aromatic quality. Blackcurrant adds fruity depth and a subtle tart nuance that balances the invigorating mint profile.

The base structure is founded on an ozonic accord, plant sap, and rose. The ozonic accord provides a clean and airy effect reminiscent of fresh air after a summer rain, while plant sap contributes a natural green freshness. Rose softens the dry-down with delicate floral elegance and a refined character.

The dominant accords of this composition include citrus fresh, mint aromatic, ozonic clean, fruity green, and cooling herbal facets. The fragrance leaves a clean, energetic, and refreshing trail with a distinctive modern citrus-mint character.

TECHNICAL DATA SHEET

Application: Lemon Mint Fragrance Oil is intended for use in the manufacture of scented candles, wax melts, reed diffusers, air fresheners, and other fragranced formulations. The recommended concentration for scented candles generally ranges between 7–10%, while concentrations of 10–15% are recommended for wax melts, depending on the desired fragrance intensity and the type of base used. For wax-based formulations, it is recommended that the fragrance be incorporated into the liquid wax base according to the wax manufacturer's guidelines to ensure optimal dispersion and stability. For maximum permitted usage levels, the IFRA Certificate should be consulted. The fragrance demonstrates very good stability and a pronounced fresh-mint character.

Regulatory Compliance: This fragrance oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and Regulation (EC) No. 1223/2009) and complies with French IFRA standards.
