

TECHNICAL DATA SHEET

Lemongrass and Geranium Fragrance Oil

Product Name: Lemongrass and Geranium Fragrance Oil.

Olfactory Classification: Lemongrass and Geranium Fragrance Oil belongs to the citrus herbal, aromatic fresh, and green floral fragrance family, characterized by a pronounced citrusy, herbal, and refreshing profile. The composition combines notes of geranium, verbena, lemongrass, mint, eucalyptus, and rose, creating an energetic and naturally fresh fragrance with remarkable aromatic clarity.

Description of the Fragrance Oil: The composition is fresh, herbal, and intensely revitalizing, featuring a harmonious blend of citrus, green, and floral nuances. The fragrance exhibits medium intensity, excellent diffusion, and a long-lasting refreshing trail.

The opening of the composition is built around geranium and verbena. Geranium provides a delicate rosy floralcy with aromatic green undertones, while verbena contributes vibrant citrus brightness and a refreshing lemon-like character. Together, they create a clean, luminous, and inviting introduction.

In the heart of the fragrance, lemongrass and mint unfold. Lemongrass delivers a distinctive citrus-herbal profile with a clean and energetic aroma, while mint enhances the sensation of cool freshness and contributes to the fragrance's dynamic aromatic effect. The heart of the composition feels revitalizing, light, and exceptionally refreshing.

The base structure is founded on eucalyptus leaf and rose. Eucalyptus imparts camphoraceous and green freshness with a subtle woodland character, while rose softens the dry-down with an elegant floral nuance and balances the citrus-herbal profile of the composition.

The dominant accords of this composition include citrus herbal, green aromatic, mint fresh, eucalyptus clean, and soft floral facets. The fragrance leaves a clean, energetic, and naturally refreshing trail with a distinctive herbal character.

Application: Lemongrass and Geranium Fragrance Oil is intended for use in the manufacture of scented candles, wax melts, reed diffusers, air fresheners, and other

TECHNICAL DATA SHEET

fragranced formulations. The recommended concentration for scented candles generally ranges between 7–10%, while concentrations of 10–15% are recommended for wax melts, depending on the desired fragrance intensity and the type of base used. For wax-based formulations, it is recommended that the fragrance be incorporated into the liquid wax base according to the wax manufacturer's guidelines to ensure optimal dispersion and stability. For maximum permitted usage levels, the IFRA Certificate should be consulted. The fragrance demonstrates very good stability and a pronounced fresh-herbal character.

Regulatory Compliance: This fragrance oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and Regulation (EC) No. 1223/2009) and complies with French IFRA standards.
