Lily of the Valley Fragrance Oil

Product Name: Lily of the Valley Fragrance Oil.

Olfactory Classification: Lily of the Valley Fragrance Oil belongs to the floral fresh, green floral, and clean musk fragrance family, characterized by a distinctly floral, green, and elegantly clean profile. The composition combines notes of bergamot, young grass, freesia, lily of the valley, jasmine, rose, and white cedar, creating a sophisticated and airy floral fragrance inspired by the beauty of spring in bloom.

Description of the Fragrance Oil: The composition is delicate, elegant, and distinctly floral, enriched with clean green nuances and a soft musky base. The fragrance exhibits medium intensity, excellent diffusion, and a long-lasting, clean floral trail.

The opening of the composition is built around bergamot, young grass, and freesia. Bergamot provides refreshing citrus brightness and a subtle bitterness, while young grass contributes a natural green freshness reminiscent of the first days of spring. Freesia introduces light floral transparency and refined freshness, creating a luminous and graceful introduction.

In the heart of the fragrance, notes of lily of the valley, ylang-ylang, jasmine, rose, and cyclamen unfold. Lily of the valley forms the central accord of the composition, imparting a clean, crystal-clear floral character with delicate green nuances. Ylang-ylang and jasmine add richer floral fullness and a subtle exotic warmth, while rose and cyclamen contribute additional floral complexity and softness.

The base structure is founded on white cedar and musk. White cedar provides gentle woody stability and sophisticated cleanliness, while musk extends the longevity of the composition with a soft and sensual finish that elegantly rounds out the floral notes.

The dominant accords of this composition include fresh floral, lily of the valley, green spring, soft musk, and clean woody facets. The fragrance leaves a clean, delicate, and sophisticated trail with a distinctive spring floral character.

TECHNICAL DATA SHEET

Application: Lily of the Valley Fragrance Oil is intended for use in the manufacture of scented candles, wax melts, reed diffusers, air fresheners, and other fragranced formulations. The recommended concentration for scented candles generally ranges between 7–10%, while concentrations of 10–15% are recommended for wax melts, depending on the desired fragrance intensity and the type of base used. For wax-based formulations, it is recommended that the fragrance be incorporated into the liquid wax base according to the wax manufacturer's guidelines to ensure optimal dispersion and stability. For maximum permitted usage levels, the IFRA Certificate should be consulted. The fragrance demonstrates very good stability and a pronounced fresh-floral character.

Regulatory Compliance: This fragrance oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and Regulation (EC) No. 1223/2009) and complies with French IFRA standards.
