

TECHNICAL DATA SHEET

Monoï Fragrance Oil

Product Name: Monoï Fragrance Oil

Olfactory Classification: Monoï Fragrance Oil belongs to the Floral–Tropical fragrance family, characterized by a warm, exotic, and sensual profile. The composition is built around rich floral notes typical of the Polynesian monoï accord, complemented by a soft and enveloping finish.

Description: The composition is intense, warm, and relaxing, exhibiting a medium to strong intensity and stable diffusion. The fragrance character is exotic, floral, and delicately creamy, with a pronounced impression of tropical elegance. The opening is dominated by ylang-ylang, which provides a rich, soft, and subtly sweet floral structure, creating a pleasant and soothing first impression.

In the heart of the fragrance, an intense floral bouquet unfolds, highlighted by notes of orange blossom and tuberose. Orange blossom contributes a radiant and elegant floral facet, while tuberose introduces depth and fullness, forming a layered and expressive heart of the composition.

The base structure is founded on tiare flower and the monoï accord. These notes provide a warm, enveloping, and long-lasting finish with a distinctive tropical character. The dry-down is soft, stable, and comforting, marked by a pronounced sensation of exotic warmth and sensory indulgence.

The dominant accords of this composition include tropical floral, exotic warm, and creamy soft profiles, which together create a rich and commercially appealing fragrance character. The floral aspect is dominant and defines the identity of the composition, while the base ensures longevity and overall harmony of the fragrance.

TECHNICAL DATA SHEET

Application: Monoi Fragrance Oil is intended for use in fragranced formulations, including scented candles, wax melts, and other perfumery products, where the dosage should be adjusted according to the desired fragrance intensity. Testing is recommended to determine the optimal concentration depending on the type of base and technological system employed. For maximum permitted concentrations, the relevant IFRA Certificate should be consulted. The fragrance demonstrates good stability and uniform diffusion, combined with a pronounced and long-lasting tropical character.

Monoi Fragrance Oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and 1223/2009/EC) and IFRA standards. It has not been tested on animals.
