

TECHNICAL DATA SHEET

Rose Fragrance Oil

Product Name: Rose Fragrance Oil

Olfactory Classification: Rose Fragrance Oil belongs to the floral fruity, rose musk, and creamy woody fragrance family, characterized by an elegant floral, fruity, and creamy woody profile. The composition combines notes of blackcurrant, pomegranate, bergamot, cedarwood, rose, freesia, vanilla, sandalwood, raspberry, and musk, creating a sophisticated and romantic fragrance with a modern floral signature.

Description: The composition is elegant, richly floral, and delicately fruity, featuring a pronounced rose character supported by a creamy base. The fragrance exhibits a medium to strong intensity, excellent diffusion, and a long-lasting sophisticated trail. The opening is built around blackcurrant, pomegranate, and bergamot. Blackcurrant provides rich fruity depth with subtle tart nuances, while pomegranate contributes juicy and exotic fruity fullness. Bergamot introduces citrus elegance and refreshing brightness, balancing the fruity opening and preparing the transition into the floral heart.

The heart of the fragrance unfolds through notes of cedarwood, rose, and freesia. Cedarwood provides a subtle woody structure and elegant depth that supports the floral notes without overpowering them. Rose serves as the central accord of the composition, expressing a rich, velvety, and romantic floral character, while freesia contributes airy and luminous floral freshness that softens and brightens the heart of the fragrance.

The base structure is founded on vanilla, sandalwood, raspberry, and musk. Vanilla and sandalwood impart warm creamy richness and a soft finish, while raspberry further enhances the fruity character of the composition. Musk contributes clean sensuality and extends the longevity of the fragrance with an elegant and comforting dry-down.

The dominant accords of this composition include velvety rose, fruity berries, creamy sandalwood, soft musk, and an elegant floral profile. The fragrance leaves a sophisticated, romantic, and pleasantly warm floral trail.

TECHNICAL DATA SHEET

Application: Rose Fragrance Oil is intended for the manufacture of scented candles, wax melts, reed diffusers, and other fragranced formulations. It is particularly suitable for floral collections, elegant home fragrances, and romantic compositions thanks to its distinctive rose and creamy musky character. The recommended concentration depends on the type of base and the desired fragrance intensity, while preliminary testing of compatibility and fragrance diffusion is recommended for wax-based formulations. For maximum permitted concentrations, the relevant IFRA Certificate should be consulted.

Rose Fragrance Oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and 1223/2009/EC) and French IFRA standards.
