

TECHNICAL DATA SHEET

Sakura Flower Fragrance Oil

Product Name: Sakura Flower Fragrance Oil

Olfactory Classification: Sakura Flower Fragrance Oil belongs to the floral green, spring blossom, and soft honeyed fragrance family, characterized by a delicate floral, green, and subtly creamy profile. The composition combines notes of green floral accords, orange blossom, honeysuckle, jasmine, lily of the valley, floral honey, and coconut blossom, creating an elegant spring fragrance inspired by the blooming Japanese sakura.

Description: The composition is light, floral, and airy, enriched with pronounced spring-like and floral-green nuances. The fragrance exhibits a medium intensity, delicate diffusion, and an elegant long-lasting trail. The opening is built around green floral accords and orange blossom. The green floral accords provide a fresh botanical and spring-like atmosphere reminiscent of blooming gardens and young greenery, while orange blossom contributes delicate citrus florality with a subtle sunlit warmth.

The heart of the composition unfolds through honeysuckle, jasmine, and lily of the valley. Honeysuckle imparts rich floral sweetness with a soft honeyed nuance, while jasmine contributes a more sensual and intense floral depth. Lily of the valley introduces crystal-clear freshness and a light spring character, lending elegance and airiness to the composition.

The base structure is founded on floral honey and coconut blossom. Floral honey provides warm, subtly gourmand sweetness that extends the longevity of the floral notes, while coconut blossom contributes exotic creamy softness and a delicate tropical finish.

The dominant accords of this composition include sakura blossom, floral green, honeysuckle nectar, soft jasmine, and a creamy coconut blossom profile. The fragrance leaves a delicate, elegant, and pleasantly spring-like floral trail.

TECHNICAL DATA SHEET

Application: Sakura Flower Fragrance Oil is intended for the manufacture of scented candles, wax melts, reed diffusers, and other fragranced formulations. It is particularly suitable for spring collections, floral home fragrances, and elegant spa formulations thanks to its delicate floral and green character. The recommended concentration depends on the type of base and the desired fragrance intensity, while preliminary testing of compatibility and fragrance diffusion is recommended for wax-based formulations. For maximum permitted concentrations, the relevant IFRA Certificate should be consulted.

Sakura Flower Fragrance Oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and 1223/2009/EC) and French IFRA standards.
