

TECHNICAL DATA SHEET

Salted Butter Caramel Fragrance Oil

Product Name: Salted Butter Caramel Fragrance Oil

Olfactory Classification: Salted Butter Caramel Fragrance Oil belongs to the gourmand caramel, creamy coconut, and milky sweet fragrance family, characterized by a rich caramelized, creamy, and milky gourmand profile. The composition combines notes of caramel, coconut, and milk, creating a warm and intensely sweet fragrance inspired by salted caramel desserts and creamy confections.

Description: The composition is intensely gourmand, creamy, and richly caramelized, featuring pronounced milky facets and warm sweet nuances. The fragrance exhibits a medium to strong intensity, excellent diffusion, and a long-lasting sweet trail. The opening is built around dominant notes of caramel. Caramel delivers a rich and indulgent gourmand aroma with subtle roasted and caramelized nuances reminiscent of melted sugar and creamy caramel treats. The opening impression is warm, pleasantly sweet, and intensely dessert-like.

The heart of the composition unfolds through coconut, which contributes creamy tropical richness and a delicate exotic softness. Its milky and velvety nuances soften the intensity of the caramel, lending the composition a smoother and more balanced gourmand character.

The base structure is founded on notes of milk. Milky notes provide a creamy and comforting finish that enhances the longevity of the fragrance while further emphasizing the warm dessert atmosphere of the composition. The dry-down is soft, rich, and distinctly creamy.

The dominant accords of this composition include salted caramel, creamy coconut, milky sweetness, warm gourmand, and a soft dessert profile. The fragrance leaves a warm, rich, and pleasantly sweet gourmand trail.

TECHNICAL DATA SHEET

Application: Salted Butter Caramel Fragrance Oil is intended for the manufacture of scented candles, wax melts, reed diffusers, and other fragranced formulations. It is particularly suitable for gourmand collections, autumn and winter fragrances, as well as dessert-inspired products featuring warm sweet notes. The recommended concentration depends on the type of base and the desired fragrance intensity, while preliminary testing of compatibility and fragrance diffusion is recommended for wax-based formulations. For maximum permitted concentrations, the relevant IFRA Certificate should be consulted.

Salted Butter Caramel Fragrance Oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and 1223/2009/EC) and French IFRA standards.
