

TECHNICAL DATA SHEET

Sandalwood Fragrance Oil

Product Name: Sandalwood Fragrance Oil

Olfactory Classification: Sandalwood Fragrance Oil belongs to the woody oriental, creamy amber, and soft spicy fragrance family, characterized by a warm woody, creamy, and subtly spicy profile. The composition combines notes of elemi, cardamom, patchouli, cedarwood, iris, sandalwood, white musk, and amber, creating a sophisticated and elegant woody fragrance with a pronounced creamy depth.

Description: The composition is rich, elegantly woody, and creamy-oriental, featuring pronounced warm and balsamic nuances. The fragrance exhibits a medium to strong intensity, excellent diffusion, and a long-lasting sophisticated trail. The opening is built around elemi and cardamom. Elemi provides a resinous freshness with subtle citrus facets that brighten the composition and add aromatic vibrancy, while cardamom introduces a warm spicy dimension and refined exotic elegance.

The heart of the composition unfolds through patchouli, cedarwood, and iris. Patchouli delivers an earthy and slightly dark depth that adds character and richness, while cedarwood contributes a clean woody structure and warm stability. Iris softens the heart with its powdery and elegant nuances, introducing refined smoothness and balance.

The base structure is founded on sandalwood, white musk, and amber. Sandalwood serves as the dominant accord of the composition, offering rich creamy woody warmth with a soft balsamic character. White musk contributes clean sensuality and a smooth finish, while amber adds resinous warmth and a subtly sweet depth that extends the longevity of the fragrance.

The dominant accords of this composition include creamy sandalwood, warm amber, elegant woods, soft spices, and a powdery iris profile. The fragrance leaves a luxurious, warm, and elegantly woody trail with a pronounced creamy finish.

TECHNICAL DATA SHEET

Application: Sandalwood Fragrance Oil is intended for the manufacture of scented candles, wax melts, reed diffusers, and other fragranced formulations. It is particularly suitable for luxury woody collections, spa formulations, and sophisticated ambient fragrances thanks to its rich sandalwood and amber character. The recommended concentration depends on the type of base and the desired fragrance intensity, while preliminary testing of compatibility and fragrance diffusion is recommended for wax-based formulations. For maximum permitted concentrations, the relevant IFRA Certificate should be consulted.

Sandalwood Fragrance Oil is manufactured in accordance with European regulations (CLP Regulation (EC) No. 1907/2006 and 1223/2009/EC) and French IFRA standards.
