

TECHNICAL DATA SHEET

Soft Chamomile Fragrance Oil

Product name: Fragrance Oil "Soft Chamomile".

Olfactory classification: Soft Chamomile Fragrance Oil belongs to the soft floral, clean woody and powdery musky fragrance group, with a soothing floral, clean and gently woody character. The composition combines notes of pear, chamomile, aldehydic accords, eucalyptus, jasmine, cedarwood, hyacinth, white flowers, musk, violet and sandalwood, creating an elegant and relaxing fragrance inspired by a clean and calming environment.

Fragrance description: The composition is delicate, clean and soothingly floral, with pronounced powdery and soft woody nuances. The fragrance has a medium intensity, pleasant diffusion and a long-lasting soft trail. The opening is built around pear, chamomile, aldehydic notes and eucalyptus. Pear adds a light fruity sweetness and juicy softness, while chamomile contributes a gentle herbal-floral character with a calming effect. Aldehydic accords provide a clean and airy sensation, giving the composition a feeling of freshness and neatness, while eucalyptus introduces refreshing aromatic clarity.

In the heart of the composition, jasmine, cedarwood, hyacinth and white flowers unfold. Jasmine and white flowers bring elegant floral fullness and delicate sophistication, while hyacinth adds spring-like floral freshness. Cedarwood provides a soft woody structure and stability that balances the floral character of the composition.

The base structure is built on musk, violet, metallic accords and sandalwood. Musk delivers a soft sensuality and clean finish, while violet contributes a powdery elegance. Metallic accords introduce a modern and slightly mineral facet that adds depth, while sandalwood provides a warm, creamy woody foundation.

The dominant accords of this composition include soft chamomile, clean aldehydic freshness, powdery violet, elegant white florals and a creamy sandalwood profile. The fragrance leaves a clean, soothing and elegantly powdery trail.

TECHNICAL DATA SHEET

Application: Soft Chamomile Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for spa collections, clean cotton concepts and relaxing ambient fragrances due to its clean floral-powdery character. The recommended concentration depends on the type of base and desired fragrance intensity, while in wax-based formulations pre-testing for compatibility and diffusion is advised. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and French IFRA standards.
