

TECHNICAL DATA SHEET

Spring Garden Fragrance Oil

Product name: Fragrance Oil "Spring Garden".

Olfactory classification: Spring Garden Fragrance Oil belongs to the fresh floral, green fruity and soft musky fragrance group, with a refreshing citrus, green and powdery-floral character. The composition combines notes of lemon peel, mandarin, white peach, fig leaves, white flowers, cedarwood and white musk, creating an elegant spring-inspired fragrance evoking blooming gardens and morning freshness.

Fragrance description: The composition is fresh, airy and elegantly floral, with soft green and powdery nuances. The fragrance has a medium to strong intensity, good diffusion and a long-lasting clean trail.

The opening is built around lemon peel, mandarin and white peach. Lemon peel and mandarin provide vibrant citrus freshness and a sunny character, while white peach adds a soft fruity sweetness and velvety fullness. The top notes evoke morning spring air filled with citrus and fruit nuances.

In the heart of the composition, fig leaves and white flowers develop. Fig leaves bring a green, slightly woody and natural character, while white flowers add delicate powdery floral softness and a sense of purity. This combination creates a sophisticated and soothing floral accord inspired by blooming spring gardens.

The base structure is built on cedarwood and white musk. Cedarwood provides a dry woody elegance and structural stability, while white musk leaves a soft, clean and sensual trail that enhances longevity and gives a lasting sense of freshness.

The dominant accords of this composition include citrus freshness, green fig leaves, soft white florals, clean musk and elegant cedarwood. The fragrance leaves a light, clean and sophisticated spring-like trail.

TECHNICAL DATA SHEET

Application: Spring Garden Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for spring collections, clean floral concepts and fresh garden compositions due to its green-floral and clean character. The recommended concentration depends on the type of base and desired fragrance intensity, while in wax-based formulations pre-testing for compatibility and diffusion is advised. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and French IFRA standards.
