

TECHNICAL DATA SHEET

Vanilla Ice Cream Fragrance Oil

Product name: Fragrance Oil "Vanilla Ice Cream".

Olfactory classification: Vanilla Ice Cream Fragrance Oil belongs to the creamy gourmand, vanilla dessert and powdery sweet fragrance group, with a rich creamy, vanilla and sweet gourmand character. The composition combines notes of almond, speculoos biscuit, vanillin sugar, coconut, musk, vanilla and powdery accords, creating a warm and comforting fragrance inspired by creamy desserts and vanilla ice cream.

Fragrance description: The composition is creamy, gourmand and intensely vanilla-driven, with soft spicy and powdery nuances. The fragrance offers medium to strong intensity, very good diffusion and a long-lasting sweet trail.

The opening is built around almond and a speculoos accord. Almond brings a soft nutty sweetness and creamy richness, while speculoos adds a warm gourmand facet with hints of cinnamon, caramel and baked biscuit. The opening evokes freshly prepared sweet desserts and creamy treats.

In the heart of the composition, vanillin sugar and coconut develop. Vanillin sugar delivers an intense sweet creamy vanilla fullness that dominates the composition and creates the impression of smooth vanilla ice cream. Coconut adds milky creaminess and a soft tropical warmth, further smoothing the gourmand profile.

The base structure is built on musk, vanilla and powdery accords. Musk provides a soft clean sensual trail that enhances longevity, while vanilla reinforces the warm sweet richness. Powdery accords add an elegant finish and a soft texture reminiscent of melting creamy ice cream.

The dominant accords of this composition include creamy vanilla, sweet gourmand, milky coconut, biscuit accord and powdery musk. The fragrance leaves a rich, warm and intensely creamy gourmand impression.

TECHNICAL DATA SHEET

Application: Vanilla Ice Cream Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for gourmand collections, dessert-inspired compositions and warm ambient fragrances due to its rich vanilla-creamy character. The recommended concentration depends on the type of base and desired fragrance intensity, with mandatory prior testing for compatibility and diffusion. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Origin & Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and IFRA standards.
