

TECHNICAL DATA SHEET

Verbena and Blood Orange Fragrance Oil

Product name: Fragrance Oil "Verbena and Blood Orange".

Olfactory classification: Verbena and Blood Orange Fragrance Oil belongs to the fresh citrus, aromatic green and watery woody fragrance group, with an intense citrus, herbal and refreshing character. The composition combines notes of lemon, elemi, mint leaves, grapefruit peel, bitter orange, mandarin, watery accords, sage, white cedarwood and patchouli, creating an energetic and sophisticated citrus-aromatic fragrance.

Fragrance description: The composition is vibrant, refreshing and aromatic-citrus, with soft green and woody nuances. The fragrance offers medium to strong intensity, excellent diffusion and a long-lasting clean trail.

The opening is built around lemon, elemi and mint leaves. Lemon delivers intense citrus freshness and energetic brightness, while elemi adds a resinous citrus depth with subtle spicy nuances. Mint leaves introduce a cool aromatic freshness and enhanced clarity, creating a bright and stimulating opening.

In the heart of the composition, grapefruit peel, bitter orange and mandarin develop. Grapefruit adds vibrant citrus bitterness and juicy freshness, while mandarin contributes soft fruity sweetness and fullness. Bitter orange enriches the composition with elegant bitter-floral nuances, enhancing the sophisticated citrus character inspired by verbena and blood orange.

The base structure is built on watery accords, sage, white cedarwood and patchouli. Watery accords provide a clean refreshing character, while sage adds herbal aromatic depth and green nuances. White cedarwood delivers dry woody elegance, and patchouli introduces warm earthy richness that enhances longevity.

The dominant accords of this composition include sparkling citrus, aromatic verbena, fresh mint, watery accord and earthy patchouli. The fragrance leaves a clean, energetic and sophisticated citrus impression.

TECHNICAL DATA SHEET

Application: Verbena and Blood Orange Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for fresh citrus collections, spa formulations and clean aromatic ambient scents due to its citrus-herbal-aquatic profile. The recommended concentration depends on the type of base and desired fragrance intensity, with mandatory prior testing for compatibility and diffusion. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Origin & Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and IFRA standards.
