

TECHNICAL DATA SHEET

Yummy Pink Fragrance Oil

Product name: Fragrance Oil "Yummy Pink".

Olfactory classification: Yummy Pink Fragrance Oil belongs to the fruity gourmand, creamy candy and sweet musky fragrance group, with a pronounced fruity, creamy and sweet gourmand character. The composition combines notes of lemon, apple, marshmallow, strawberry, caramel, coconut, vanilla and musk, creating a playful and intensely sweet fragrance inspired by fruity sweets and creamy desserts.

Fragrance description: The composition is cheerful, gourmand and intensely creamy-fruity, with soft sweet and powdery nuances. The fragrance offers medium to strong intensity, very good diffusion and a long-lasting sweet trail.

The opening is built around lemon, fresh citrus accords, apple and marshmallow. Lemon and citrus notes provide vibrant and slightly tangy freshness that brightens the composition, while apple adds crisp fruity fullness and juicy sweetness. Marshmallow introduces a soft sugary creaminess and airy gourmand texture that immediately establishes a warm and playful character.

In the heart of the composition, strawberry, caramel and coconut develop. Strawberry adds a juicy candy-fruity character reminiscent of sweet treats and creamy desserts, while caramel delivers warm melted sweetness and gourmand depth. Coconut contributes creamy milky softness and a gentle tropical nuance that rounds out the composition.

The base structure is built on musk, vanilla and gourmand accords. Musk provides a soft and comforting trail that smooths the intense sweetness, while vanilla adds warm creamy richness and enhances longevity. Gourmand accords reinforce the dessert-like character and leave a soft, pleasantly sweet finish.

The dominant accords of this composition include fruity candy, creamy caramel, soft marshmallow, sweet vanilla and milky coconut. The fragrance leaves a warm, playful and intensely gourmand impression.

TECHNICAL DATA SHEET

Application: Yummy Pink Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for gourmand collections, candy-inspired scents and sweet ambient compositions due to its rich fruity-caramel profile. The recommended concentration depends on the type of base and desired fragrance intensity, with mandatory prior testing for compatibility and diffusion. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Origin & Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and IFRA standards.
