

TECHNICAL DATA SHEET

Yuzu Fragrance Oil

Product name: Fragrance Oil "Yuzu".

Olfactory classification: Yuzu Fragrance Oil belongs to the fresh citrus, aromatic spicy and clean green fragrance group, with a vibrant citrus, refreshing and subtly spicy character. The composition combines notes of mandarin, grapefruit, orange, ginger, lemon, verbena and yuzu, creating an energetic and sophisticated citrus fragrance with pronounced freshness.

Fragrance description: The composition is bright, refreshing and citrus-aromatic, with soft green and spicy nuances. The fragrance offers medium to strong intensity, very good diffusion and a clean long-lasting trail.

The opening is built around mandarin, grapefruit and orange. Mandarin brings juicy citrus sweetness and soft fruity fullness, while grapefruit adds refreshing bitter brightness that enhances the dynamic character of the composition. Orange contributes warm citrus richness and additional vibrancy, creating a luminous and energetic opening.

In the heart of the composition, ginger and lemon develop. Ginger introduces a warm aromatic-spicy dimension with a subtle piquant edge that contrasts the citrus freshness, while lemon further enhances the bright and clean character with sharp refreshing nuances.

The base structure is built on verbena and a yuzu accord. Verbena provides herbal citrus freshness with a soft green facet, while yuzu delivers a distinctive blend of tart, sweet and slightly bitter citrus tones. The dry-down is clean, elegant and long-lastingly refreshing.

The dominant accords of this composition include sparkling citrus, juicy mandarin, aromatic ginger, fresh lemon and a clean yuzu profile. The fragrance leaves an energetic, clean and sophisticated citrus impression.

TECHNICAL DATA SHEET

Application: Yuzu Fragrance Oil is intended for use in the production of scented candles, wax melts, diffusers and other fragrance formulations. It is particularly suitable for fresh citrus collections, spa formulations and modern clean fragrance concepts due to its vibrant citrus-aromatic profile. The recommended concentration depends on the type of base and desired fragrance intensity, with mandatory prior testing for compatibility and diffusion. For maximum allowed usage levels, consultation of the IFRA certificate is required.

Origin & Compliance: This fragrance oil is produced in accordance with European regulations (EC No. 1907/2006 and 1223/2009/EEC) and IFRA standards.
