

TECHNICAL DATA SHEET

Product Name: 101 Candle Fragrance Oil.

Olfactory classification: 101 Fragrance Oil belongs to the spicy woody, powdery aromatic and earthy resinous fragrance groups, with a pronounced spicy, powdery and deeply woody character. The composition combines notes of ginger, carrot, cardamom, white iris, nutmeg, lavender, cedarwood, patchouli and cypress, creating a sophisticated fragrance with an aromatic opening, a powdery heart and a persistent woody base.

Fragrance oil description: The composition is elegant, aromatic and layered, with warm spicy nuances, a powdery floral heart and a deep earthy-woody finish. The fragrance has a medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around ginger, carrot and cardamom. Ginger provides a piquant and vibrant spicy freshness, while carrot contributes an earthy, subtly sweet and root-like nuance. Cardamom introduces aromatic warmth and discreet exotic sweetness, creating an unusual and dynamic opening. White iris, nutmeg and lavender develop in the heart of the fragrance. White iris brings powdery softness and refined elegance, while nutmeg contributes warm spicy depth. Lavender adds floral-herbal freshness and aromatic balance, softening the intensity of the spicy notes. The base is built around cedarwood, patchouli and cypress. Cedarwood provides a firm, dry and stable woody foundation, while patchouli contributes earthy depth and a darker aromatic character. Cypress introduces green, resinous and subtly coniferous freshness, rounding out the composition with a complex and long-lasting finish. The dominant accords include spicy ginger, earthy carrot, powdery iris, aromatic lavender and resinous woods. The fragrance leaves a deep, elegant and distinctly sophisticated woody-spicy impression.

Applications: 101 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for spicy, woody, powdery and aromatic collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.

TECHNICAL DATA SHEET

Regulatory compliance: The fragrance oil is manufactured in accordance with the relevant requirements of Regulation (EC) No 1907/2006 (REACH), Regulation (EC) No 1272/2008 (CLP) and the applicable Standards of the International Fragrance Association (IFRA).

Animal testing: The fragrance oil has not been tested on animals.
