

TECHNICAL DATA SHEET

Product Name: 102 Candle Fragrance Oil.

Olfactory classification: 102 Fragrance Oil belongs to the spicy woody, resinous oriental and musky sandalwood fragrance groups, with a pronounced spicy, resinous and deeply woody character. The composition combines notes of cardamom, grapefruit, rosewood, saffron, patchouli, myrrh, vetiver, white sandalwood and musk, creating a sophisticated fragrance with a fresh spicy opening, a rich resinous heart and a warm woody-musky base.

Fragrance oil description: The composition is elegant, deep and distinctly oriental, with a citrus-spicy opening, a resinous heart and a creamy woody finish. The fragrance has a medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around cardamom, grapefruit and rosewood. Cardamom provides fresh aromatic piquancy and warm spicy depth, while grapefruit contributes vibrant citrus freshness with a subtle bitterness. Rosewood introduces soft woody warmth with discreet floral nuances, creating a complex and elegant opening. Saffron, patchouli and myrrh develop in the heart of the fragrance. Saffron contributes warm, subtly leathery and spicy tones, while patchouli provides earthy woody depth and a discreet smoky character. Myrrh introduces rich balsamic and resinous nuances, further deepening the oriental profile of the composition. The base is built around vetiver, white sandalwood and musk. Vetiver provides a dry, earthy and stable woody foundation, while white sandalwood contributes creamy softness and warmth. Musk rounds out the composition with a soft, sensual and long-lasting trail. The dominant accords include spicy cardamom, citrus grapefruit, saffron myrrh, earthy patchouli, creamy sandalwood and warm musk. The fragrance leaves a rich, warm and distinctly sophisticated woody-resinous impression.

Applications: 102 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for oriental, spicy, resinous and woody-musky collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
