

TECHNICAL DATA SHEET

Product Name: 103 Candle Fragrance Oil.

Olfactory classification: 103 Fragrance Oil belongs to the aromatic aquatic, fresh spicy and amber musk fragrance groups, with a pronounced citrus, aquatic and aromatic-woody character. The composition combines notes of lemon, pepper, lavender, aquatic accords, musk, amber and patchouli, creating a clean and sophisticated fragrance with a dynamic opening, a refreshing heart and a warm base.

Fragrance oil description: The composition is fresh, aromatic and elegantly aquatic, with subtle spicy nuances and a warm amber-musky finish. The fragrance has a medium-strong intensity, very good diffusion and a long-lasting, clean trail. The opening is built around lemon and pepper. Lemon provides bright citrus freshness and pronounced vibrancy, while pepper contributes subtle piquancy and additional dynamism. Their combination creates an energetic and clean opening. Lavender and aquatic accords develop in the heart of the fragrance. Lavender introduces floral-herbal softness and aromatic balance, while the aquatic accords contribute a sense of cleanliness, airiness and refreshing lightness. The base is built around musk, amber and patchouli. Musk provides a soft and velvety trail, while amber contributes warm balsamic fullness and depth. Patchouli introduces an earthy and subtly dark nuance that rounds out the composition and extends its longevity. The dominant accords include fresh citrus, aromatic lavender, aquatic freshness, warm amber, soft musk and earthy patchouli. The fragrance leaves a clean, modern and sophisticated aromatic impression.

Applications: 103 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for fresh, aromatic, aquatic and amber-musky collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.

Regulatory compliance: The fragrance oil is manufactured in accordance with the relevant requirements of Regulation (EC) No 1907/2006 (REACH), Regulation (EC) No 1272/2008 (CLP) and the applicable Standards of the International Fragrance Association (IFRA).

Animal testing: The fragrance oil has not been tested on animals.
