

TECHNICAL DATA SHEET

Product Name: 104 Candle Fragrance Oil.

Olfactory classification: 104 Fragrance Oil belongs to the spicy oriental, powdery woody and amber musk fragrance groups, with a pronounced spicy, powdery and warm woody-amber character. The composition combines notes of spices, bergamot, rose, cedarwood, iris, vanilla, amber, black musk and sandalwood, creating a rich and sophisticated fragrance with a warm opening, an elegant heart and a deep sensual base.

Fragrance oil description: The composition is intense, elegant and distinctly oriental, with warm spicy nuances, a powdery floral heart and a creamy woody finish. The fragrance has a medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around spices, bergamot and rose. The spicy notes provide vibrant and warm aromatic energy, while bergamot introduces bright citrus freshness and subtle tangy vibrancy. Rose contributes rich, velvety floral fullness and brings elegant softness to the opening of the composition. Cedarwood, iris and vanilla develop in the heart of the fragrance. Cedarwood provides a firm, dry and stable woody structure, while iris introduces powdery sophistication and delicate softness. Vanilla links these notes with warm, creamy sweetness and gives the heart of the composition additional fullness. The base is built around amber, black musk and sandalwood. Amber contributes deep resinous warmth and balsamic fullness, while black musk provides a more intense, darker and more sensual character. Sandalwood rounds out the composition with rich creamy-woody softness and extends the longevity of the fragrance. The dominant accords include warm spices, powdery iris, creamy vanilla, deep amber, black musk and soft sandalwood. The fragrance leaves a rich, warm and distinctly sophisticated oriental impression.

Applications: 104 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for oriental, spicy, powdery, ambery and woody-musky collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
