

TECHNICAL DATA SHEET

Product Name: 110 Candle Fragrance Oil.

Olfactory classification: 110 Fragrance Oil belongs to the aromatic woody, fresh spicy and amber vanilla fragrance groups, with a pronounced citrus, aromatic, woody and warm character. The composition combines notes of bergamot, a fresh accord, cardamom, floral notes, cedarwood, lavender, amber, patchouli, musk and vanilla, creating a sophisticated fragrance with a clean opening, an aromatic-woody heart and a warm base.

Fragrance oil description: The composition is fresh, elegant and aromatic, with subtle spicy nuances and a warm amber-vanilla finish. The fragrance has medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around bergamot and a fresh accord. Bergamot provides bright citrus freshness with a subtle floral nuance, while the fresh accord contributes a clean, airy and crystalline character. Together, they create a light and energetic opening. Cardamom, a floral accord, cedarwood and lavender develop in the heart of the fragrance. Cardamom introduces warm aromatic-spicy depth, while the floral accord contributes softness and elegance. Cedarwood provides a firm and dry woody structure, and lavender introduces a clean herbal-floral character and additional aromatic balance. The base is built around amber, patchouli, musk and vanilla. Amber provides warm balsamic fullness, while patchouli contributes earthy and subtly dark depth. Musk adds a soft and sensual trail, and vanilla rounds out the composition with warm creamy sweetness and a subtle gourmand character. The dominant accords include fresh bergamot, aromatic cardamom, lavender, dry cedar, warm amber, earthy patchouli, soft musk and creamy vanilla. The fragrance leaves a clean, warm and sophisticated aromatic-woody impression.

Applications: 110 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for aromatic, fresh-spicy, woody, ambery and vanilla collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
