

TECHNICAL DATA SHEET

Product Name: 113 Candle Fragrance Oil.

Olfactory classification: 113 Fragrance Oil belongs to the aromatic spicy, herbal woody and amber patchouli fragrance groups, with a pronounced citrus, herbal, spicy and warm woody character. The composition combines notes of lemon, a fresh accord, cinnamon, geranium, rosemary, thyme, nutmeg, tonka bean, amber, vetiver and patchouli, creating a dynamic fragrance with a bright opening, a rich aromatic heart and a warm, earthy-woody base.

Fragrance oil description: The composition is fresh, aromatic and distinctly spicy, with herbal nuances and a warm, subtly smoky finish. The fragrance has medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around lemon and a fresh accord. Lemon provides bright citrus freshness and pronounced tangy vibrancy, while the fresh accord contributes a clean, airy and subtly watery character, creating a dynamic and energetic opening. Cinnamon, geranium, rosemary, thyme and nutmeg develop in the heart of the fragrance. Cinnamon provides warm spicy fullness, while geranium contributes a green-floral and subtly rosy nuance. Rosemary introduces a clean herbal character, thyme adds a dry aromatic and subtly rustic note, and nutmeg rounds out the heart with warm woody-spicy depth. The base is built around tonka bean, amber, vetiver and patchouli. Tonka bean provides soft vanilla-like and subtly almond-like sweetness, while amber contributes warm balsamic fullness. Vetiver introduces a dry, earthy and subtly smoky woody structure, while patchouli further deepens the composition with dark earthy nuances and extends its longevity. The dominant accords include fresh lemon, aromatic herbs, warm cinnamon, geranium, nutmeg, tonka bean, vetiver, patchouli and warm amber. The fragrance leaves a powerful, warm and sophisticated aromatic-spicy impression.

Applications: 113 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for aromatic, herbal, spicy, woody and ambery collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
