

TECHNICAL DATA SHEET

Product Name: 115 Candle Fragrance Oil.

Olfactory classification: 115 Fragrance Oil belongs to the fresh floral, powdery musk and woody chypre fragrance groups, with a pronounced citrus, floral, powdery and elegantly woody character. The composition combines notes of bergamot, lemon, mandarin, lily of the valley, iris, pink pepper, white musk, patchouli and sandalwood, creating a sophisticated fragrance with a bright citrus opening, a delicate floral heart and a warm woody-musky base.

Fragrance oil description: The composition is fresh, elegant and airy-floral, with subtle spicy nuances and a creamy-woody finish. The fragrance has medium-strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around bergamot, lemon and mandarin. Bergamot provides bright citrus freshness with a subtle bitter and aromatic nuance, while lemon introduces pronounced tangy vibrancy. Mandarin contributes fruity sweetness and rounds out the opening with a pleasant, energetic citrus character. Lily of the valley, iris and pink pepper develop in the heart of the fragrance. Lily of the valley provides clean, spring-like floral freshness, while iris contributes powdery softness and an elegant texture. Pink pepper introduces discreet spicy piquancy, further deepening the floral character of the composition. The base is built around white musk, patchouli and sandalwood. White musk provides a clean, soft and sensual trail, while patchouli introduces earthy and subtly woody depth. Sandalwood rounds out the composition with warm, creamy fullness and extends its longevity. The dominant accords include sparkling citrus, lily of the valley, powdery iris, pink pepper, soft white musk and creamy sandalwood. The fragrance leaves a clean, elegant and sophisticated floral-woody impression.

Applications: 115 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for fresh floral, powdery, clean musk and woody collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.

TECHNICAL DATA SHEET

Regulatory compliance: The fragrance oil is manufactured in accordance with the relevant requirements of Regulation (EC) No 1907/2006 (REACH), Regulation (EC) No 1272/2008 (CLP) and the applicable Standards of the International Fragrance Association (IFRA).

Animal testing: The fragrance oil has not been tested on animals.
