

TECHNICAL DATA SHEET

Product Name: 202 Candle Fragrance Oil.

Olfactory classification: 202 Fragrance Oil belongs to the fruity floral, gourmand amber and soft woody fragrance groups, with a pronounced citrus, tropical, floral and warm gourmand character. The composition combines notes of pink pepper, mandarin zest, pineapple, orange blossom, jasmine, caramel, musk, vanilla and amber wood, creating a sophisticated fragrance with a bright fruity opening, a rich floral-gourmand heart and a warm woody-amber base.

Fragrance oil description: The composition is vibrant, elegant and distinctly gourmand, with tropical fruity nuances, an opulent floral heart and a warm, creamy-woody finish. The fragrance has medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around pink pepper, mandarin zest and pineapple. Pink pepper provides subtle fruity-spicy piquancy, while mandarin zest contributes intense citrus freshness and bright aromatic character. Pineapple introduces juicy tropical sweetness and additional vibrancy, creating a dynamic and appealing opening. Orange blossom, jasmine and caramel develop in the heart of the fragrance. Orange blossom and jasmine provide rich, smooth and elegant floral fullness, while caramel introduces a gourmand contrast with warm, subtly caramelised sweetness. This combination creates a velvety and opulent heart. The base is built around musk, vanilla and amber wood. Musk provides a soft and sensual trail, while vanilla contributes creamy sweetness and warmth. Amber wood introduces dry, woody and subtly resinous depth, giving the finish additional structure, elegance and longevity. The dominant accords include pink pepper, mandarin zest, tropical pineapple, orange blossom, jasmine, caramel, creamy vanilla, amber wood and soft musk. The fragrance leaves a warm, elegant and sophisticated fruity-gourmand impression.

Applications: 202 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for fruity floral, gourmand, amber, vanilla and soft woody collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
