

TECHNICAL DATA SHEET

Product Name: 208 Candle Fragrance Oil.

Olfactory classification: 208 Fragrance Oil belongs to the spicy oriental, tobacco amber and resinous woody fragrance groups, with a pronounced spicy, warm, tobacco and balsamic character. The composition combines notes of bergamot, rum, cinnamon, dates, cashmere wood, a sweet accord, nutmeg, blond tobacco, amber, musk and benzoin, creating a rich and sophisticated fragrance with an exotic opening, a warm heart and a deep resinous base.

Fragrance oil description: The composition is rich, warm and distinctly oriental, with spicy, fruity and tobacco nuances. The fragrance has medium-strong to strong intensity, very good diffusion and a long-lasting, sophisticated trail. The opening is built around bergamot, rum, cinnamon and dates. Bergamot provides bright citrus freshness, while rum contributes warm, sweet and aromatic depth. Cinnamon introduces a pronounced spicy character, while dates add rich fruity sweetness and fullness, creating a complex and pleasant opening. Cashmere wood, a sweet accord, nutmeg and blond tobacco develop in the heart of the fragrance. Cashmere wood provides soft, warm and elegantly woody fullness, while the sweet accord contributes velvety softness. Nutmeg introduces warm spicy depth, and blond tobacco adds a dry, subtly sweet and discreetly smoky nuance. The base is built around amber, musk and benzoin. Amber provides warm resinous depth and fullness, while benzoin contributes balsamic, subtly vanilla-like sweetness. Musk rounds out the composition with a soft and long-lasting trail, giving the finish additional elegance and longevity. The dominant accords include warm rum, spicy cinnamon, dates, cashmere wood, blond tobacco, amber, benzoin and soft musk. The fragrance leaves a warm, deep and distinctly sophisticated oriental impression.

Applications: 208 Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. It is particularly suitable for oriental, spicy, tobacco, amber and balsamic collections. The recommended concentration depends on the type of base and the desired fragrance intensity, subject to prior compatibility, stability and diffusion testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
