

TECHNICAL DATA SHEET

Product Name: Gourmand Pastry Ornat Fragrance Oil.

Olfactory classification: Gourmand Pastry Ornat Fragrance Oil belongs to the fruity gourmand, almond pastry and powdery vanilla fragrance groups, with a pronounced fruity, nutty and creamy-sweet character. The composition combines notes of cherry, candied cherry, almond, iris, vanilla and raspberry, creating a rich and elegant fragrance inspired by fruit desserts, marzipan and fine pastries.

Fragrance oil description: The composition is rich, sweet and distinctly gourmand, with a fruity opening, an almond-powdery heart and a warm vanilla finish. The fragrance has medium to pronounced intensity, very good diffusion and a long-lasting pleasant trail. The opening is built around cherry and candied cherry. Cherry provides juicy fruity sweetness with a subtly tart nuance, while candied cherry further enhances the composition's sweet character with notes of caramelised sugar. Together, they create a rich and appealing gourmand opening. Almond and iris unfold in the heart. Almond provides pronounced nutty sweetness and a marzipan character, while iris contributes elegant powdery softness and additional depth. This combination gives the composition a sophisticated pastry nuance and a softer, velvety texture. The base is built around vanilla and raspberry. Vanilla provides warm, creamy and enveloping sweetness, while raspberry introduces juicy, subtly tart fruity freshness that balances the rich gourmand base and extends the composition's fruity character. The dominant accords include cherry gourmand, candied fruit, almond pastry, powdery iris, creamy vanilla and raspberry. The fragrance leaves a warm, sweet and elegantly gourmand impression.

Applications: Gourmand Pastry Ornat Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers and other fragranced formulations of natural origin. It is particularly suitable for gourmand, pastry, almond, cherry and vanilla collections. The recommended concentration for wax-based formulations is approximately 5-7%, subject to prior compatibility, stability and fragrance intensity testing. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations.
