

TECHNICAL DATA SHEET

Product Name: Mimosa Fragrance Oil.

Olfactory classification: Mimosa Fragrance Oil belongs to the floral powdery, soft spring floral and woody musk fragrance groups, with a pronounced floral, powdery and elegantly warm character. The composition combines notes of blackcurrant, mimosa, jasmine, tea, iris, musk and sandalwood, creating a sophisticated and soothing floral fragrance inspired by spring blossoms.

Fragrance oil description: The composition is delicate, elegant and airy-floral, with subtle fruity nuances and powdery depth. The fragrance has medium intensity, very good diffusion and a long-lasting soft trail. The opening is built around blackcurrant and mimosa. Blackcurrant provides light fruity freshness with a subtly tart nuance, while mimosa contributes warm floral softness and sunny floral elegance. This combination creates a pleasant and bright opening with a pronounced spring-like character. Jasmine, tea and iris unfold in the heart. Jasmine provides rich and sensual floral fullness, while tea contributes subtle aromatic calmness and elegant lightness. Iris introduces powdery sophistication and a delicate velvety texture that further refines the composition. The base is built around musk and sandalwood. Musk provides soft sensuality and extends the composition's longevity with a clean and pleasant finish, while sandalwood contributes warm woody depth and stability. The dominant accords include powdery floral, mimosa blossom, soft jasmine, elegant iris and creamy sandalwood. The fragrance leaves a delicate, sophisticated and soothing floral trail with elegant powdery nuances.

TECHNICAL DATA SHEET

Applications: Mimosa Fragrance Oil is intended for the manufacture of scented candles, wax melts, diffusers, air fresheners and other fragranced formulations. The recommended concentration for scented candles is generally 7-10%, while 10-15% is recommended for wax melts, depending on the desired intensity and the type of base. In wax-based formulations, the fragrance should be added to the liquid base in accordance with the wax manufacturer's recommendations to ensure optimal dispersion and stability. The relevant IFRA Certificate should be consulted to determine the maximum permitted concentrations. The fragrance demonstrates very good stability and a pronounced floral-powdery character.

Regulatory compliance: The fragrance oil is manufactured in accordance with the relevant requirements of Regulation (EC) No 1907/2006 (REACH), Regulation (EC) No 1272/2008 (CLP) and the applicable Standards of the International Fragrance Association (IFRA).
